

Age Depth Plotting Tool and Neptune database

Webstart Java application to construct age vs depth plots for marine cores linked to Neptune database (contains microfossil data from 300+ DSDP and ODP holes)

View here:
http://portal.chronos.org/gridsphere/gridsphere?cid=tools_adp

Timescale Information System: Age Range Chart

Graphical representation of occurrences of taxa in multiple sites (data from Neptune)

View here:
<http://portal.chronos.org/gridsphere/gridsphere?cid=arc>

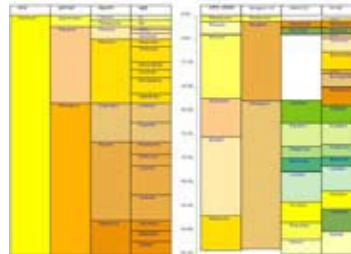

Search data in Neptune and database network

Searches can be conducted by keyword, time, or location

View here:
<http://portal.chronos.org/gridsphere/gridsphere?cid=searches>

Timescale Information System: time scale conversion and comparisons

Graphical interface to 2004 Global Time Scale and 19 other time scales

View here:
<http://portal.chronos.org/gridsphere/gridsphere?cid=ec>

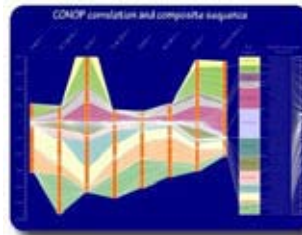

PSICAT Tool

Paleontological Stratigraphic Interval Construction and Analysis Tool
 Java application for interactive core-logging

View here:
http://portal.chronos.org/gridsphere/gridsphere?cid=tools_services

CONOP9 web service

Constrained optimization tool for correlation of multiple fossiliferous stratigraphic sections

View here:
http://portal.chronos.org/gridsphere/gridsphere?cid=tools_services

Time Scale Creator Tool

Tool to visualize the 2004 Global Time Scale and many related datasets from EXXON
